### Quality Service

We Tint Windows' experienced tinters have been installing window films for more than 20 years so we understand what our customers expect from the products we offer and the services we provide. We can tailor our services to suit your needs and value your time and money: you want your car and home to be protected with as few resources wasted as possible. Our quality workmanship guarantees you the benefit of your car being delivered to you in good time (no more than a few hours for most vehicles) with no dots, gaps, creases or bubbles in your tint. Meaning your vehicle will maintain that brand new showroom finish with no fuss.

We offer a range of services from:

- Automotive tinting
- Home and Office tinting
- Car protection for your brand new vehicle
- Electronic rust-proofing
- Interior protection – Fabric & Leather / Vinyl protection
- Written Lifetime warranties and much more

Tinting is a good idea for a variety of reasons, especially because our tints are designed to reduce the fading that occurs as a result of sun exposure in your vehicle or home. They can also offer you:

- Increased security: protecting your items from the view of others and discouraging break-ins. (Our Black Tint and Illegal for Road Use tints can offer you security and peace of mind in our car tinting range. Or our Safety & Security Tint in our home tinting services).
- Reduced glare: our most popular tint is the Black Tint, which reduces glare by up to 65%. Our other tints can reduce glare by as much as 80% or as little as 25%, depending on your needs.
- Decreased energy costs to your home and vehicle.

According to the Window Film Association of Australia and New Zealand (WFAANZ) window tinting is much more effective at reducing your home energy costs than blinds, external shades or high-performance window glass.

If you'd like to find out more, you can give us a call or view our entire range of tinting services here.

### Quality Products

The staff at We Tint Windows have a vast knowledge of the products available on the market so only the highest quality products will be applied to your car or home. We have the additional benefit of being an accredited 3M Installer - 3M are the inventors of home and automotive window film and manufacture a majority of our high quality film products.

### How to find us

Located at **1/77 Moss Street in SLACKS CREEK, QUEENSLAND 4127.**

Our services are available to customers throughout Logan, Brisbane and Gold Coast areas. Unfortunately all automotive tinting must be completed on site and require you to bring your vehicle to our workshop. We would be more than happy to accommodate, by arranging an appointment during your lunch break or calling a taxi service on your behalf, if, for instance, you work full-time or have appointments elsewhere on the day.

### 100% Money back Guarantee on Workmanship.

If you believe a window tint completed by us is unsatisfactory please bring it back to us and we will fix it free of charge. If, after fixing the tint, you are still unhappy we will remove the tint at no cost to you and refund your money back.

## Home and Office Tinting

### Home, Office and Commercial Tinting

Your home is your pride and joy and we know the Queensland sun can be harsh. Why not get your home or office tinted by a company who can guarantee excellent workmanship? We use only the best products on the market.

You want the best for your home and family so it makes sense to use a supplier who will provide just that. What we can offer you is protection for your home and family from the Sun's harsh UV rays. Your windows play a big role in the temperature of your home and we know that in the hotter months the Sun can be unbearable. In times of harsher weather or should a break-in ever occur your windows are most at risk. Whether you want to improve the comfort of your home, cool things down or simply protect you and your belongings from the Sun we'll provide you with only the highest quality films that come with a lifetime guarantee. Our films are designed to control fading, protect your furnishings and you, reduce cooling costs and add an appealing aesthetic to your home. Our range of films includes a variety of colours and shades to suit your needs. Find out today how we can help you by giving us a call.

#### Additional reasons to consider home or office tinting:

**Fading control.** UV light and solar heat coming through any window causes fading and damage to the things you value. Everything from your furnishings and hardwood floors, carpets and curtains are at risk. Window films help by filtering out visible light, rejecting heat and blocking over 99% of the harmful UV light – significantly reducing your potential for damage and protecting what you treasure most.

**Heat Reduction.** Our window films can remove up to 79% of the sun's heat entering your house through your windows and glass doors. This creates a much more enjoyable environment for you and your family or your employees.

**Energy Savings.** With the cost of electricity continuing to rise, business' and home owners are looking for ways to cut costs. With the help of our Window films that reduce the heat coming into your home or business and keep interior temperatures controlled and stable, your air conditioning unit (or units in some cases) are put under less stress. Consequently, these units use less energy and in turn reduce your power bill, saving your money for the things that really matter to you. With new laws on the horizon, which will
